Projects

Project Suraksha QR | *JavaScript, HTML5, Tailwind CSS, Security Analysis* Jul '25

- An innovative solution designed to combat the rise of UPI payment scams.
- Introduced a multi-layered security framework, including dynamic risk analysis, time-locked transactions for suspicious payments.
- A robust three-factor authentication protocol to protect users from fraud.

Mission AFCAT | HTML, Tailwind CSS, Node.js, JavaScript, React.js Mar '25

- Mission AFCAT is an interactive, AI-powered educational web application designed specifically for aspirants of the Air Force Common Admission Test (AFCAT).
- Unlike static study websites, this is a dynamic "Command Center" that guides students through a rigorous 20-day preparation strategy.
- Integrated OpenAI API to deliver dynamic suggestions for destinations, activities, stays and meals, improving recommendation relevance and user engagement

FEAT (Field Enhanced Awareness Tech) | **Python, Computer Vision, Systems Architecture** Dec '25

- Acted as Lead Systems Architect to design and develop a real-time tactical Head-Up Display (HUD) and threat detection system.
- Engineered core threat-detection algorithms utilizing Python and Computer Vision to process real-time environmental data.
- Architected secure, scalable system infrastructure to ensure zero-latency data transmission and high-reliability performance in field environments.

Training

CSE Pathshala | **Logic Building, Programming and Data Structure** Jun '25 – Jul '25

- Strengthening logic-building skills through hands-on problem-solving, improving code efficiency and reducing execution time across multiple tasks by 20%.
- Implemented **10+ dynamic question** rendering with Thyme leaf, session-based state management for quiz flow, and modular backend logic using custom Java classes and optimized DSA-based structures.
- Developed and debugged modular programs in C++, improving algorithmic thinking and enhancing overall program performance by 25%.

Salesforce CRM Development | **Apex, Visualforce, Custom Objects, Data Modelling** Feb '26

- Engineered custom CRM solutions by configuring complex data schemas, custom objects (including Job Application tracking), and relationships within the Salesforce platform.
- Authored custom business logic and user interfaces utilizing Apex and Visualforce pages.
- Implemented strict validation rules and customized list view configurations to ensure data integrity and optimize user workflows.

Certifications

Privacy and Security in Online social media | NPTEL Nov '25

Computer Communications | Coursera Aug '24

Software Development Processes and Methodologies | Coursera May '24

Technical Skills

- **Languages:** Java, C++, C, Python, JavaScript, Apex
- **Web Technologies:** HTML5, Tailwind CSS, Node.js, React.js, Thymeleaf, Visualforce
- **Tools & Platforms:** Salesforce (Trailhead), GitHub, Kali Linux, Parrot OS, Nmap, Wireshark
- **Core Competencies:** Systems Architecture, Computer Vision, Threat Analysis, Risk Management, Security Analysis, Incident Response, Vulnerability Assessment (CVE)

Education

Lovely Professional University, Punjab **Aug ‘23 – Present**
B. Tech, Computer Science and Engineering — CGPA: 7.04 *Phagwara, Punjab*

Kendriya Vidyalaya No.2 Agra Cantt. **Mar ‘22 – May ‘23**
Intermediate, PCM – 73.8% *Agra, Uttar Pradesh*

Kendriya Vidyalaya AFS Jodhpur **Mar ‘20 – May ’21**
Matriculation – 92% *Jodhpur, Rajasthan*
